Instructions

• Overview Video: <https://youtu.be/xIS-nqFfink>

1. Ensure you've followed the lessons to set up your GitHub, git, and VS Code
2. Fill in the below tasks (note: it'll save as you go)
3. Once everything is filled in, ensure you click "Submit and Export PDF"
4. Upload the PDF to GitHub in a Module1 folder
5. Find the downloaded PDF and move it into the location of your local repository folder (don't use the Github upload option as we want to practice the git commands)
6. Use `git add .` to track all file changes (i.e., the PDF)
7. Use `git commit -m "Uploading M1 PDF"` to record the change and provide a meaningful message
8. Use `git push origin main` to move the changes to the remote repository's main branch (Note: Future assignments will have a dedicated branch name for their work)
9. Take the same PDF and upload it to the Canvas submission

Section #1: (10 pts.) Tasks

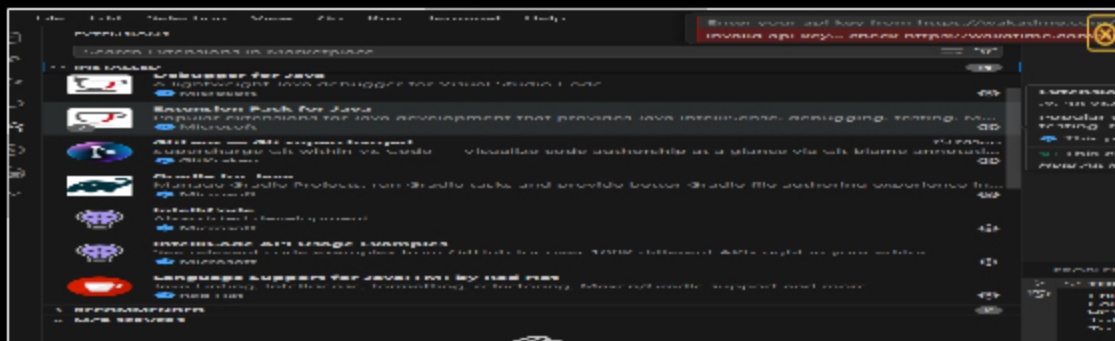

Progress: 100%

 **Task #1 (2.22 pts.) - Screenshot of VS Code Extensions for this class**

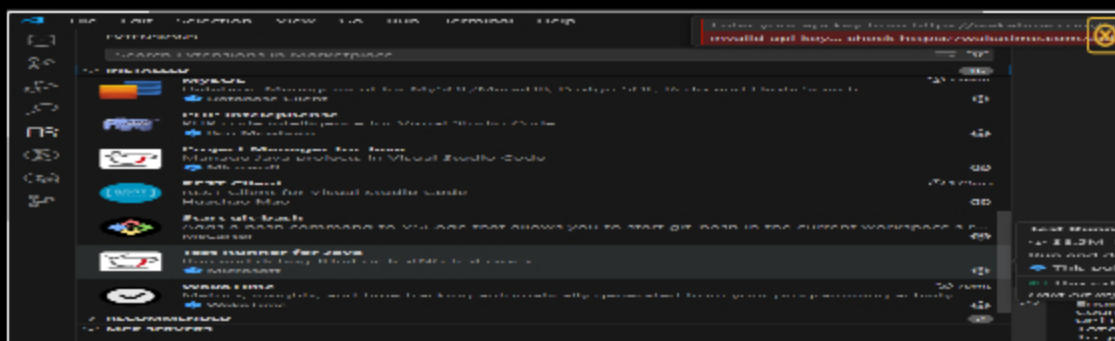

Progress: 100%

Details:

- Ensure you have the following extensions
- Java (Oracle's, RedHat's or any other valid one)
- WakaTime
- Git Lens

Showing pt 1 of vs code extensions (Gitlens & Java Redhat)

Showing pt 2 of vs code extensions (Waka Time)

Task #2 (2.22 pts.) - Screenshot of WakaTime Setup

Progress: 100%

Details:

- Visit the WakaTime site
- Click the "Projects" tab and find your repository and select it
- Include a screenshot of the top part that shows the overall time and the repository name
- Scroll down and screenshot the bottom portion that shows the individual files/branches and include that. (You won't need to capture the visuals)

Task #3 (2.22 pts.) - Demonstrate that you have the JDK available

Progress: 100%

Details:

- Run `java --version` in the terminal
- Run `javac --version` in the terminal
- Record the output (both should be the same version and yield no errors).

```
PROBLEMS  DEBUG CONSOLE  TERMINAL  PORTS  CITIENS
> TERMINAL
Karen@karenannahi MSYS /c/Kar65-IT1114-007-2025 (main)
$ java --version
Java(TM) SE Runtime Environment (build 24.0.2+12-54)
Java HotSpot(TM) 64-Bit Server VM (build 24.0.2+12-54, mixed mode, sharing)

Task #5 (2.22 pts.) - Reflection

Progress: 100%

Details:

- Did you have any issues/problems this module? If so, what were they and how did you solve them?
- Did you learn anything new this module? If so, provide some brief details.
- If both answers were no, briefly explain your prior background.

Your Response:

Did you have any issues/problems this module? If so, what were they and how did you solve them? At first I kept getting a text that read "permission denied/ could not create work tree dir" because I was running the command in a folder. Entering the API key was also tricky but I got it on step #2. Did you learn anything new this module? If so, provide some brief details. I learned to fix my mistake because in class I got lost in the process of setting up my Waka Time but I got it with this assignment. I also switched

my repo key visibility to public. If both answers were no, briefly explain your prior background.
